

Intraday Trading Strategy (Long Futures + OTM Put Hedge with Camarilla & RSI)

Index Strategy – Nifty & Bank Nifty

- 1 Trade only after first 15 minutes.
- 2 Breakout Long: Enter above resistance with RSI > 60.
- 3 Reversal Long: Enter near support with RSI < 35 and turning up.
- 4 Stop loss: Below breakout/reversal level.
- 5 Target: 200–300 points (Nifty) or 1.5% move.

Hedge Strategy (OTM Put)

- 1 Buy 1–1.5% OTM put for indices.
- 2 For stocks: 3–5% OTM put.
- 3 Hedge size ~30% of futures exposure.
- 4 Limit premium risk to 0.3% of capital.

Stock Selection

- 1 Reliance Industries – breakout trades.
- 2 HDFC Bank – VWAP + strength confirmation.
- 3 Tata Motors – high beta momentum.

Risk Management

- 1 Max risk per trade: 1% capital.
- 2 Avoid trades when RSI between 40–55.
- 3 Trail stop after 1:1 risk-reward.
- 4 Avoid trades in low volatility.

Execution Workflow

- 1 Wait for first 15-min candle.
- 2 Mark high/low levels.
- 3 Check RSI alignment.
- 4 Enter near Camarilla levels.
- 5 Apply hedge immediately.
